Projection based on:

Maine 2009 Fluorescent Lamp Recycling Law

Important dates:

By January 1, 2010, a manufacturer that is required to implement a mercury-added lamp recycling program shall submit its proposed program to the Maine Department of Environmental Protection (DEP) for review and approval.

- DEP must solicit public comment before approving or denying proposed program – expect to do this early in 2010.
- DEP may approve program for CFLs if manufacturers provide “...adequate financial support for the collection and recycling of such lamps to municipalities and a conservation program established...by the Public Utilities Commission.”

There are currently 167 municipal sites that collect some type of Universal waste for recycling. Of these, 164 currently accept mercury lamps, with 80 of these also accepting lamps from businesses.

Lamps collected by municipal sites:

- Hazardous waste manifests for the period of July 1, 2008-June 30, 2009 show 218,438 mercury lamps shipped from municipal collection sites.
- Solid waste facility and municipal annual reports from calendar year 2008 – 24,600 mercury bulbs and 490,778 feet of linear fluorescents.

Efficiency Maine most recent reported 12 months recycled 5,520 CFLs through 127 shipments.

Effective January 1, 2011, each manufacturer shall individually or collectively implement a department-approved program for the recycling of mercury-added lamps from households.

Beginning April 1, 2011, a manufacturer not in compliance with this section is prohibited from offering any mercury-added lamp for final sale in the State or from distributing any mercury-added lamp into the State. A manufacturer not in compliance with this section shall provide support to retailers to ensure the manufacturer’s mercury-added lamps are not offered for sale, sold at final sale or distributed in the State.

Background on recycling

Report Regarding the Recycling of Fluorescent Lamps and Consumer Education Efforts – January 2008 www.maine.gov/dep/rwm/homeowner/cfldep_puc/cflreportwithdep_puc.pdf

- Business lamp recycling rate around 25% even with extensive E&O

Household Compact Fluorescent Light (CFL) Recycling in Maine – 2009 Travis P. Wagner, USM

- Focus on reducing real or perceived inconvenience to dropping off CFLs by significantly increasing the number of free collection points.
- E&O message should focus on educating public specifically on locations for free CFL recycling.

HOUSEHOLD LAMP EXCERPTS FROM
PUBLIC Law, Chapter 272 LD 973, 124th Maine State Legislature
An Act To Provide for the Safe Collection and Recycling of Mercury-containing Lighting

Sec. 1. 38 MRSA § 1672. Mercury-added lamps

1. Definitions. As used in this section, unless the context otherwise indicates, the following terms have the following meanings.

A. "Manufacturer" means a person who manufactures a mercury-added lamp and has a presence in the United States or a person who imports a mercury-added lamp manufactured by a person who does not have a presence in the United States.

B. "Mercury-added lamp" means an electric lamp to which mercury is intentionally added during the manufacturing process, including, but not limited to, linear fluorescent, compact fluorescent, black light, high-intensity discharge, ultraviolet and neon lamps.

C. "Municipal collection site" means a solid waste disposal facility, transfer station, storage facility or recycling facility at which mercury-added lamps from households are collected for recycling that is municipally owned or operated or operated by a regional association.

D. "Person" means any individual, corporation, partnership, cooperative, association, firm, sole proprietorship, government agency or other entity.

4. Manufacturer recycling programs for household mercury-added lamps. Effective January 1, 2011, each manufacturer of mercury-added lamps sold or distributed for household use in the State on or after January 1, 2001 shall individually or collectively implement a department-approved program for the recycling of mercury-added lamps from households.

A. The recycling program required under this subsection must include:

(1) Convenient collection locations located throughout the State where residents can drop off their household lamps without cost, including but not limited to municipal collection sites and participating retail establishments;

(2) Handling and recycling equipment and practices in compliance with the universal waste rules adopted pursuant to section 1319-O, subsection 1, paragraph F and all other applicable requirements;

(3) Effective education and outreach, including, but not limited to, point-of-purchase signs and other materials provided to retail establishments without cost; and

(4) An annual report to the department on the number of mercury-added lamps recycled under the manufacturer's program, the estimated percentage of mercury-added lamps available for recycling that were recycled under the program and the methodology for estimating the number of mercury-added lamps available for recycling, an evaluation of the effectiveness of the recycling program, recommendations for increasing the number of lamps recycled under the recycling program and an accounting of the costs associated with administering and implementing the recycling program.

B. A manufacturer required to implement a recycling program under this subsection shall submit its proposed recycling program for department review and approval. The department shall solicit

public comment on the proposed program before approving or denying the program.

C. Beginning April 1, 2011, a manufacturer not in compliance with this section is prohibited from offering any mercury-added lamp for final sale in the State or distributing any mercury-added lamp in the State. A manufacturer not in compliance with this section shall provide support to retailers to ensure the manufacturer's mercury-added lamps are not offered for sale, sold at final sale or distributed in the State.

D. Beginning April 1, 2011, a retailer may not offer for final sale a mercury-added lamp produced by a manufacturer not in compliance with this section. The department shall notify retailers of the manufacturers of mercury-added lamps not in compliance with this section.

E. Beginning April 15, 2013, and biennially thereafter, the department shall calculate the percentage of mercury-added lamps recycled from households and report to the joint standing committee of the Legislature having jurisdiction over natural resources matters on any modifications to the manufacturer recycling programs it intends to make to improve mercury-added lamp recycling rates and any recommendations for statutory changes needed to facilitate mercury-added lamp collection and recycling.

F. The department may determine that a manufacturer's recycling program is in compliance with paragraph A, subparagraphs (1), (2) and (4) for the collection of compact fluorescent lamps from households if the manufacturer provides adequate financial support for the collection and recycling of such lamps to municipalities and a conservation program established pursuant to Title 35-A, section 3211-A and implemented by the Public Utilities Commission.

Sec. 2. Recycling program submission date for existing manufacturers. A manufacturer subject to the Maine Revised Statutes, Title 38, section 1672 and in existence on the effective date of this Act shall submit its proposed recycling program pursuant to Title 38, section 1672, subsection 4, paragraph B by January 1, 2010.

Sec. 4. Report on recycling of mercury-added lamps from households. The Department of Environmental Protection shall submit a report by January 1, 2010 to the Joint Standing Committee on Natural Resources on the recycling of mercury-added lamps from households pursuant to the Maine Revised Statutes, Title 38, section 1672. The report must include, but is not limited to:

1. An assessment of the costs of the manufacturer recycling programs for mercury-added lamps to manufacturers, consumers, municipalities and others;
2. After consultation with manufacturers of mercury-added lamps, recommendations for streamlining the recycling of mercury-added lamps from households; and
3. A review and assessment of education and outreach alternatives.

The Joint Standing Committee on Natural Resources may submit legislation to the Second Regular Session of the 124th Legislature to implement recommendations included in the report.
